Program organisation

Formal status

- General Program Description finalized on 10.12.2006
- Request for funding proposed to DLR
- Grants processed by DLR
- Notification with the EU commission on July 18, 2007

Industry/Public Inst.

German National Library

Deutsche Thomson

Empolis

Festo

IRT

Intelligent Views

Lycos

M2any

Moresophy

Ontoprise

SAP

Siemens

VFI

Universities/Research Inst.

DFKI

FZI Karlsruhe

Fraunhofer Gesellschaft

LMU Munich

TU Darmstadt

TU Dresden

TU Munich

University of Karlsruhe

University of Erlangen

Structure

- 6 Use Cases
 - ORDO (empolis)
 - PROCESSUS (empolis)
 - ALEXANDRIA (Lycos Europe)
 - TEXO (SAP)
 - MEDICO (Siemens)
 - CONTENTUS (DNB)

- 8 CTC Work Packages
 - 6 operative WPs+Evaluation+CTC Management

- Transversal Groups Business Models and Architecture

Use Cases

- **ALEXANDRIA (Lycos Europe)**
 - Publishing Plattform for User generated content
 - Combination of semantics and community recommendation
- **TEXO (SAP)**
 - Future Business Value Networks (Web of services)
 - Combination of SOA-based software components
- **MEDICO (Siemens)**
 - Scalable semantical Analysis of diagnostic images im
medicine
- **CONTENTUS (DNB)**
 - Process chain for providing semantic access to AV-archives
as a part of safeguarding the national cultural heritage

Use Cases (II)

- ORDO (empolis)
 - Integrated „Digital Control center“ for
 - Distributed, heterogeneous information
 - IP-related content (as pilot application)
 - Individual organization of local and remote media assets

- PROCESSUS (empolis)
 - Integration of semantically enriched process-chains in and across industrial companies
 - Dynamic composition of content and services
 - Integration of in-house and external communication

Global Milestoneplan

CONT				1st Prototype		2nd Prototype		3rd Prototype spec. final		Final Prototype	
MEDI		1st version query language		Test bed system			Prototype for clinical eval.			Final prototype system	
TEXO		1st Demo.	1st Prototype	integrated Prototype			functional completion		dissemination		
ALEX		Beta 1		Beta 2			ALEXANDRIA Final Prototype				
PROC		Analysis		Platform 1 / Ontology		Pilots 1+2 / Platform 1.1	Evaluation				
ORDO		Specs			Pilot Phase 1			Pilot Phase 2			
	2007		2008			2009		2010		2011
